

LAWN SOLUTIONS AUSTRALIA

Lawn Rescue

A PREMIUM DUAL ACTION SPRAY-ON

DROUGHT-PROOF & FEED YOUR LAWN

GREAT FOR:

RESTORING LAWNS WHICH HAVE LOST COLOUR AND CONDITION DUE TO A LACK OF WATER AND NUTRIENTS .

A great looking lawn is a place everyone enjoys, but not everyone has the time and knowledge to achieve a showcase lawn. If your lawn is looking a little drought weary, lacking colour or suffering from the harsh winter climate, then it's **Lawn Solutions Australia Lawn Rescue**... to the rescue!

Lawn Solutions Australia Lawn Rescue contains the perfect blend of liquid fertilisers, seaweed extracts and wetting agents making it the complete treatment to revive your lawn. It is ideal for use during establishment, post establishment & for post winter revival containing both nutrients and rehydration properties.

Never before has there been a dual action product which can bring so much benefit to your lawn in just a single application. When used as a starter fertiliser, it effectively promotes the development of root systems and early turf growth. In established lawns it stimulates, supports and protects root growth and is best used to compliment your granular fertilising regime.

HOW IT WORKS

The nitrogen in liquid fertiliser is usually derived from urea, which can be absorbed through the leaves of your lawn. So unlike granular fertilisers which require a soil-borne reaction at temperature, the liquid fertiliser will give your lawn an instant boost, even when the weather is still quite cool. The seaweed extracts work to condition the soil and promote healthy root growth. Then finally the wetting agents improve your soil's ability to absorb precious moisture, thus optimising water availability to your lawn.

APPLICATION

Lawn Solutions Australia Lawn Rescue comes in a convenient ready-to-use 2L hose on bottle. Simply shake the product well prior and during use. The 2L bottle will cover 150m².

PRECAUTIONS:

Not to be used for any purpose, or in any manner, contrary to this label unless authorised under appropriate legislation.

**2L BOTTLE
TREATS 150m²**

GUARANTEED MINIMUM ANALYSIS

Nitrogen (N)	5.0%
Phosphorus (P)]	7.0%
Potassium (K)	2.0%
Kelp (S)	7.5%
